

13 July 2006

Attention: Management  
Save Perth Hills

Dear Sir/Madam

**RE: PARKERVILLE HIGHLANDS**

Further to a recent article in the Sunday Times (2/7/06), editorial in the area's local publications and subsequent postings on your website, I would like to introduce myself on behalf of Westland Group and apologies this has not been done previously.

As the developers behind the Parkerville Highlands project, Westland Group has been working for many years towards developing a project that provides both much needed infrastructure to the area as well as a range of lot size options for the changing community.

We are a local Western Australian organisation and it has therefore never been our intention to destroy the unique environment and culture of the hills in any way.

We understand you have some concerns in relation to this project and the Stoneville project. Please note that these two projects entirely separate and not related. There is much about the Parkerville Highlands project that might surprise and appease some of your concerns.

With this, we would welcome the opportunity discuss the plans for Parkerville Highlands in detail with you and address any concerns you have relating to the project.

Ideally we would meet in a controlled environment of key people from yours and my organisations. We do not believe a public debate would be of merit to anyone.

Should you wish to meet, please do not hesitate to contact myself 0408 807 870 to confirm a suitable time.

We look forward to taking steps towards a positive outcome with you.

Yours sincerely,

**Amanda Fay**
